

Centers for Disease Control and Prevention
CDC 24/7: Saving Lives. Protecting People™

We are in the flu season. Several families have dealt with the flu (or other sicknesses) during the holiday vacation.

PLEASE keep your child home until at least 24 hours after no longer having fever or signs of fever without the use of fever-reducing medicine.

Please do not send your child to school if any of these below symptoms or signs were present in the previous 24 hours:

Elevated temperature (100.4 F or greater)

Signs of fever include:

- chills
- feeling very warm
- flushed appearance
- sweating

Persistent cough

Vomiting

Repeated diarrhea

Purulent discharge (anything other than clear discharge) from nose or eyes, which indicate a possible contagious condition (green = sinus infection, yellow = bacterial infection)

If your child displays any of these symptoms, we will send him/her home until the child is symptom free or released by a doctor.

Thanks!!

Denise Autin
